

CATEGORY: LEED CERTIFIED BUILDINGS

JOHNSON CONTROLS Executive Global Headquarters Renovation

This 33-acre site campus has one of the highest concentrations of **LEED Platinum Certified Buildings** in the world and is one of four **LEED Platinum Certified Buildings** in the nation. The project focused on green construction, including high-efficiency fixtures, surfaces being filtered and reused for flushing toilets, reducing potable water consumption by 595,000 gallons annually. Geothermal heating/cooling uses circulating water from 272 wells to reduce winter heating costs by 29% and summer chiller operating costs by 23%. This renovation project has been recognized by WI DNR as a Green Tier Organization.
